ALBUQUERQUE, N.M. — A-Tech Corporation, d.b.a. Applied Technology Associates (ATA) has been awarded a \$7,456,287 cost-plus-fixed-fee modification to the Space Vehicles Advanced Technology contract (FA9453-14-D-0312), Task Order 4 for the delineation of efforts required by the Advanced Space Power Program. The areas of exploration will include energy generation, energy storage, and power management and distribution. This modification brings the total cumulative face value of the task order to \$10,571,775. Work will be performed at Kirtland Air Force Base, New Mexico, and is expected to be complete by December 21, 2020. The Air Force Research Laboratory (AFRL) is the contracting agency.

"ATA is proud to continue to support AFRL and the Advanced Space Power Program. These efforts support our strategy to continue to push technology advancements in support of our warfighters," said ATA's President, Dan Gillings.

ATA is an award-winning, small business providing high performance, state-of-the-art custom solutions, technical services; and assembly, integration, and test capabilities for ground, air, and space applications. The company specializes in line-of-sight stabilization, inertial sensing, and real-time processing systems for government and commercial customers. For more information about ATA, please visit www.atacorp.com.

Any opinions, findings and conclusions or recommendations expressed in this material are those of ATA and do not necessarily reflect the views of the AFRL.
