ALBUQUERQUE, NM — The U.S. General Services Administration (GSA) has awarded ATA a One Acquisition Solution for Integrated Services, Small Business (OASIS SB) Pool 4 contract. OASIS SB is a multiple-award IDIQ contract vehicle to provide Government agencies with a total integrated solution for a multitude of professional service-based requirements on a global basis. OASIS SB provides a single solution for complex professional services in multiple technical areas/mission spaces with the flexibility for all contract types and pricing at the task order level.

OASIS is a Tier 3 Best in Class vehicle geared toward highest technically qualified contractors intended to meet the professional service mission requirements of all Federal agencies, including all organizations within the Department of Defense (DOD) and National Security Community. ATA will provide services including, but not limited to, system engineering, configuration management, concept development, design documentation and technical data, engineering process improvement, independent verification and validation, and modeling and simulation.

“ATA is excited about our OASIS SB Pool 4 prime contract award on this world-class multiple award IDIQ contract vehicle.” said Johnathan Jones, ATA’s Director of Defense and Technology Services. “Given the importance of this contract vehicle to the U.S. Government, we look forward to pursuing new contract opportunities and providing our technology know-how infused engineering services to an entirely new customer base to meet national security needs.”

ATA's Technical Services Campaign (TSC) will carry out the OASIS SB Pool 4 contract. ATA TSC is focused on leveraging our technology know-how to be a leading provider of high-end engineering services at customer-sites in Space Systems Technologies, Directed Energy (DE) Technologies, OT&E Support, and related operations.

ATA is a leading-edge provider of precision pointing and tracking, line-of-sight stabilization solutions and products for laser communications, laser weapon systems, intelligence, surveillance, and reconnaissance (ISR), and space domain awareness applications to customers worldwide.
